

Prairie Skies Medical Imaging is Regina's largest imaging practice.

Owned by local radiologists, we have been providing comprehensive imaging services in 5 community-based clinics, two acute care hospitals and multiple Southern Saskatchewan health centres for more than 50 years.

Prairie Skies offers above average earning potential in a dynamic work environment and a diverse practice opportunity in both community and acute care facilities.

What is it really like to live, work and play in Regina?

Regina is a culturally diverse city offering a variety of amenities, cultural and sporting activities, parkland, and an international airport.

You will enjoy numerous employment and lifestyle opportunities for both you and your family, short commute times, and Saskatchewan's low cost of living that is the envy of many other provinces.

The Opportunity: We are currently seeking a sub-specialized or general radiologist with breast imaging experience to provide a full range of digital breast imaging and interventional services.

This is a full time, partnership track position that covers primarily daytime shifts with equitable evening and weekend call responsibilities and above average earning potential.

Qualifications:

- Screening and diagnostic mammography, tomosynthesis, breast US and MRI and image-guided interventional procedures.
- Eligible for licensing with the College of Physicians and Surgeons of Saskatchewan
- Fellow of the Royal College of Physicians of Canada (or eligible)
